ADDZIFY SOP

RFQ Follow-Up Tracker & Closing SOP

A 3-touch, proof-first closing routine that wins RFQs without slashing your margin

THE PRICE-WAR TRAP

The IndiaMART price race

When dozens of factories get the same lead, most compete only on the lowest price. The 'winner' often works at zero profit, or cuts corners on the batch.

The proof-first closing SOP

Strong factories never send a naked price. Every quote goes out with proof, tiered options and a fast response — so the buyer compares value, not just rate.

THE 3-TIER QUOTATION STRUCTURE

TIER	WHAT IT INCLUDES	WHY IT WORKS
Tier 1: Commercial baseline	Standard grade, standard tolerance, standard packaging, ex-factory.	Matches market rates, so you are never dismissed as 'too expensive'.
Tier 2: Certified precision run (recommended)	Virgin raw material, 100% batch dimensional check, export packaging, test certificate.	Your margin tier. Serious buyers often choose it because it removes rejection and downtime risk.
Tier 3: Annual volume contract	Raw material rate locked for 12 months, scheduled monthly dispatches.	Locks in repeat volume and takes you out of open-market bidding.

THE 3-TOUCH FOLLOW-UP CADENCE

- [ ] **Touch 1 — within 2 hours:** send the 3-tier quotation plus a 20-second video of a similar batch.
- [ ] **Touch 2 — day 3:** WhatsApp photos of export packaging and a lab test certificate.
- [ ] **Touch 3 — day 7:** raw material price update or production-slot deadline (only if genuine).
- [ ] **Log every lead within 10 minutes:** buyer, company, spec, target quantity and decision date.
- [ ] **Offer a sample early:** 3–5 pieces for approval testing before a mass order.
- [ ] **Weekly production cutoff:** share your real scheduling cutoff to set an honest deadline.

OBJECTION SCRIPT: 'COMPETITOR 10% SASTA DE RAHA HAI'

VALUE DEFENCE (WHATSAPP / PHONE)

"Bilkul sahi baat hai, sir. Market mein 10% sasta rate mil jata hai. Par manufacturing mein 10% rate aksar 3 cheezon se nikalta hai:

1. Commercial ya scrap-grade raw material (strength ya composition fail hone ka risk)
2. Testing skip karna (spectrometer ya hardness certificate nahi milta)
3. Tolerances loose rakhna (assembly line pe rejection badh jaata hai)

Humare quote mein virgin material, full batch testing aur replacement guarantee hai. Pehle ek chhota trial batch le lijiye — aap khud test kar lijiye. Spec match na ho to hum replace karenge."
